

Logikal Updates Cont...

You may or may not have been aware that Logikal contains the option to use the Kestrel order form which we would ask you to use when submitting orders. This makes things easier for us to process your orders and should eliminate any errors during the this process. The Kestrel order form can be found in the menu on the left hand side of the project screen and is positioned at the bottom of the order section as shown below.

The screenshot shows the Logikal software interface. On the left, a menu lists various order types, with 'QUOTATION / INVOICE' highlighted in a red box. A red arrow points from this menu item to a detailed order form titled 'Kestrel Aluminium Systems Order'. The order form includes a table of items with columns for Drawing, Quantity/Unit, Number, Description, Colour, and Price/PU. The items listed include various aluminium profiles, rollers, and hardware.

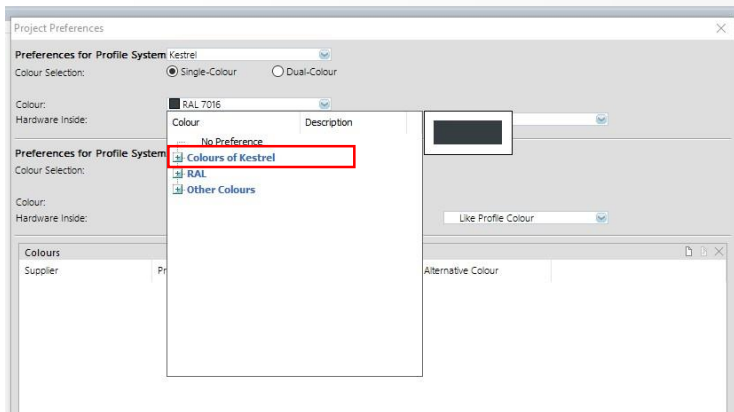

Drawing	Quantity / Unit	Number	Description	Colour	Price/PU	Total
	4 x 3.05 m	KAS60A	Slit Rubate	RAL 7016	13.70	55.04

	1 x 2.2 m	KAS76C	Lock Slit	RAL 7016	45.00	45.00

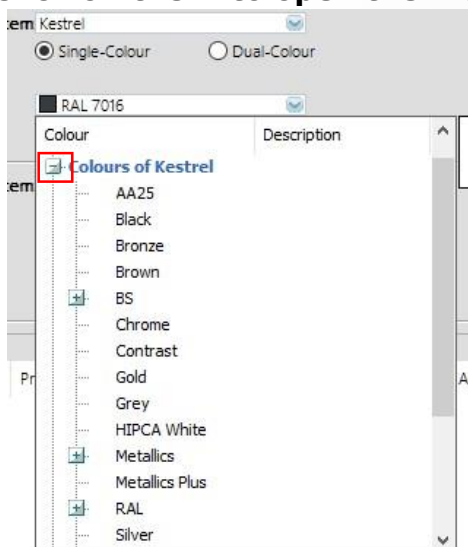

When ordering materials that are required to be powder coated by Kestrel, can you please ensure that colours are picked from the "Colours of Kestrel" range. Not choosing colours from the Kestrel range will result in the job being priced incorrectly as Logikal will assume that the material will be organised for powder coating by yourselves, and will therefore process a price for mill finish aluminium. Please see below for correct process.

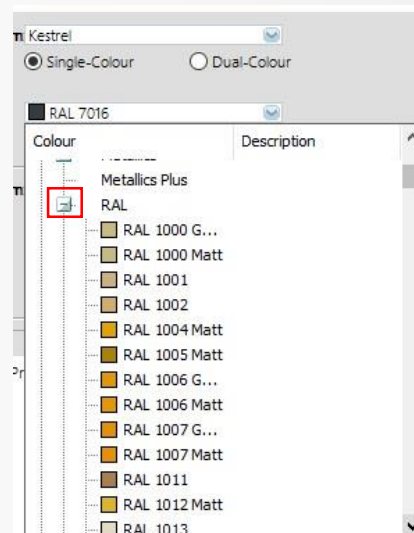

From any of the colour menus find "Colours of Kestrel"

Click on the + to open the menu.

Open up the RAL colours by clicking +

Please note: Always check with sales office regarding finish & other surcharges as these are **NOT** calculated in Logikal.
